About the Multi-Media Digital Player

The PMP is a kind of portable multi-media player that can play, record and store video, audio and image files.

The PMP is able to process digital coding, and it can store and play the signal via the AV In jack from external audio devices such as cassette recorders, CD players, and video devices (e.g., television).

The PMP is embedded with an FM module and is capable of recording FM radio and saving it in mp3 format.

Safety Declaration

In order to ensure the safe and accurate operation of this device, please read the information below before use.
