IMPORTANT

For your assistance in reporting the loss or theft of your Projector, please record the Model and Serial Number located on the bottom of the projector and retain this information. Before recycling the packaging, please be sure that you have checked the contents of the carton thoroughly against the list of "Supplied accessories" on page **11**.

Model No.:

Serial No.:

SPECIAL NOTE FOR USERS IN THE U.K.

The mains lead of this product is fitted with a non-rewireable (moulded) plug incorporating a 5A fuse. Should the fuse need to be replaced, a BSI or ASTA approved BS 1362 fuse marked ⓥ or ⓐ and of the same rating as above, which is also indicated on the pin face of the plug, must be used.

Always refit the fuse cover after replacing the fuse. Never use the plug without the fuse cover fitted.

In the unlikely event of the socket outlet in your home not being compatible with the plug supplied, cut off the mains plug and fit an appropriate type.

DANGER:

The fuse from the cut-off plug should be removed and the cut-off plug destroyed immediately and disposed of in a safe manner.

Under no circumstances should the cut-off plug be inserted elsewhere into a 5A socket outlet, as a serious electric shock may occur.

To fit an appropriate plug to the mains lead, follow the instructions below:

WARNING:

THIS APPARATUS MUST BE EARTHED.

IMPORTANT:

The wires in this mains lead are coloured in accordance with the following code:

    Green-and-yellow : Earth
    Blue   : Neutral
    Brown   : Live

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:

● The wire which is coloured green-and-yellow must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol ⏚ or coloured green or green-and-yellow.

● The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.

● The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

IF YOU HAVE ANY DOUBT, CONSULT A QUALIFIED ELECTRICIAN.

This apparatus complies with the requirements of Council Directives 89/336/EEC and 73/23/EEC as amended by Council Directive 93/68/EEC.

Dieses Gerät entspricht den Anforderungen der EG-Richtlinien 89/336/EWG und 73/23/EWG mit Änderung 93/68/EWG.

Ce matériel répond aux exigences contenues dans les directives 89/336/CEE et 73/23/CEE modifiées par la directive 93/68/CEE.

Dit apparaat voldoet aan de eisen van de richtlijnen 89/336/EEG en 73/23/EEG, gewijzigd door 93/68/EEG.

Dette udstyr overholder kravene i direktiv nr. 89/336/EEC og 73/23/EEC med tillæg nr. 93/68/EEC.

Quest' apparecchio è conforme ai requisiti delle direttive 89/336/EEC e 73/23/EEC, come emendata dalla direttiva 93/68/EEC.

Αυτή η συσκευή συμμορφώνεται με τις απαιτήσεις των οδηγιών του Συμβουλίου 89/336/ΕΟΚ και 73/23/ΕΟΚ όπως τροποποιήθηκαν από την οδηγία του Συμβουλίου 93/68/ΕΟΚ.

Este equipamento obedece às exigências das directivas 89/336/CEE e 73/23/CEE, na sua versão corrigida pela directiva 93/68/CEE.

Este aparato satisface las exigencias de las Directivas 89/336/CEE y 73/23/CEE, modificadas por medio de la 93/68/CEE.

Denna utrustning uppfyller kraven enligt riktlinjerna 89/336/EEC och 73/23/EEC så som kompletteras av 93/68/EEC.

Dette produktet oppfyller betingelsene i direktivene 89/336/EEC og 73/23/EEC i endringen 93/68/EEC.

Tämä laite täyttää direktiivien 89/336/EEC ja 73/23/EEC vaatimukset, joita on muutettu direktiivillä 93/68/EEC.

Bu cihaz Konsey Direktifi 93/68/EEC tarafından düzeltilen 89/336/EEC ve 73/23/EEC Konsey Direktiflerinin gerekliliklerine uygundur.

Tento přístroj je v souladu s požadavky směrnic rady 89/336/EEC a 73/23/EEC, tak jak byly upraveny směrnicí rady 93/68/EEC.

See seade on vastavuses Nõukogu Direktiivis nr 89/336/EEC ja 73/23/EEC esitatud nõuetega, vastavalt Nõukogu Direktiivis nr 93/68/EEC esitatud parandustele

Ez a készülék megfelel a Tanács által kiadott, 89/336/EGK és 73/23/EGK Irányelveknek és az utóbbit módosító 93/68/EGK Irányelvnek

Ši ierice atbilst tehniskam prasibam pec 89/336/EEC un 73/23/EEC direktivam papildinats ar direktivu 93/68/EEC.

Šis prietaisas atitinka ES Tarybos direktyvu 89/336/EEC ir 73/23/EEC patikslintos direktyvos 93/68/EEC reikalavimus.

To urządzenie spełnia wymagania dyrektyw 89/336/EEC i 73/23/EEC wraz z poprawkami dyrektywy 93/68/EEC.

Tento prístroj je v súlade s požiadavkami smerníc rady
89/336/EEC a 73/23/EEC tak ako boli upravené smernicou rady 93/68/EEC.

Ta aparat je v skladu z zahtevami Direktiv Sveta 89/336/EEC in 73/23/EEC kot je navedeno v dopolnilu k Direktivi Sveta 93/68/EEC.

The supplied CD-ROM contains operation instructions in English, German, French, Spanish, Italian, Dutch and Japanese. Carefully read through the operation instructions before operating the projector.

Die mitgelieferte CD-ROM enthält Bedienungsanleitungen in Englisch, Deutsch, Französisch, Spanisch, Italienisch, Niederländisch und Japanisch. Bitte lesen Sie die Bedienungsanleitung vor der Verwendung des Projektors sorgfältig durch.

Le CD-ROM fourni contient les instructions de fonctionnement en anglais, allemand, français, espagnol, italien, néerlandais et japonais. Veuillez lire attentivement ces instructions avant de faire fonctionner le projecteur.

El CD-ROM suministrado contiene instrucciones de operación en inglés, alemán, francés, español, italiano, holandés y japonés. Lea cuidadosamente las instrucciones de operación antes de utilizar el proyector.

Il CD-ROM in dotazione contiene istruzioni per l'uso in inglese, tedesco, francese, spagnolo, italiano, olandese e giapponese. Leggere attentamente le istruzioni per l'uso prima di usare il proiettore.

De meegeleverde CD-ROM bevat handleidingen in het Engels, Duits, Frans, Spaans, Italiaans, Nederlands en Japans. Lees de handleiding zorgvuldig door voor u de projector in gebruik neemt.

本機に付属のCD-ROMには、英語・ドイツ語・フランス語・スペイン語・イタリア語・オランダ語・日本語の取扱説明書が収録されています。本機をご使用の前に、この取扱説明書をよくお読みください。

Before using the projector, please read this operation manual carefully.

Introduction ENGLISH

WARNING: High brightness light source. Do not stare into the beam of light, or view directly. Be especially careful that children do not stare directly into the beam of light.

WARNING: To reduce the risk of fire or electric shock, do not expose this product to rain or moisture.

See bottom of projector.

CAUTION

**RISK OF ELECTRIC SHOCK.
DO NOT REMOVE SCREWS
EXCEPT SPECIFIED USER
SERVICE SCREW.**

**CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK,
DO NOT REMOVE COVER.
NO USER-SERVICEABLE PARTS EXCEPT LAMP UNIT.
REFER SERVICING TO QUALIFIED SERVICE
PERSONNEL.**

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk or electric shock to persons.

The exclamation point within a triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

WARNING:
This is a Class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

WARNING:
The cooling fan in this projector continues to run for about 90 seconds after the projector enters standby mode. During normal operation, when putting the projector into standby mode always use the ON/STANDBY button on the projector or on the remote control. Ensure the cooling fan has stopped before disconnecting the power cord.
DURING NORMAL OPERATION, NEVER TURN THE PROJECTOR OFF BY DISCONNECTING THE POWER CORD. FAILURE TO OBSERVE THIS WILL RESULT IN PREMATURE LAMP FAILURE.

CAUTION ON LITHIUM BATTERY (for Remote Control unit)
If a battery is reversed (positive end where the negative end belongs and vice versa), it can overheat and rupture. This has happened when young children install batteries backwards. Warn children *not* to take out batteries or install them. *Parents should install the lithium battery in the remote control.*

1

Caution Concerning Lamp Replacement

See "Replacing the Lamp" on page **55**.
⚠ LAMP REPLACEMENT WARNING:
TURN OFF THE LAMP AND DISCONNECT POWER CORD
BEFORE OPENING THIS COVER.
HOT SURFACE INSIDE. ALLOW 1 HOUR TO COOL BEFORE
REPLACING THE LAMP. REPLACE WITH SAME ROLLEI LAMP
UNIT MODEL "RVSLAMP1" ONLY.

HIGH PRESSURE LAMP:
RISK OF EXPLOSION. POTENTIAL HAZARD OF GLASS
PARTICLES IF LAMP HAS RUPTURED.
HANDLE WITH CARE. SEE OPERATION MANUAL.

SERVICEMAN-WARNING:
USE RADIATION EYE AND SKIN PROTECTION DURING
SERVICING.

⚠ AVERTISSEMENT CONCERNANT LE
REMPLACEMENT DE LA LAMPE:
ETEINDRE LA LAMPE ET DEBRANCHER LE CORDON
D'ALIMENTATION AVANT D'OUVRIR LE COUVERCLE.
L'INTERIEUR DU BOITIER ETANT EXTREMEMENT CHAUD,
ATTENDRE 1 HEURE AVANT DE PROCEDER AU
REMPLACEMENT DE LA LAMPE. NE REMPLACER QUE PAR
UNE LAMPE ROLLEI DE MODÈLE "RVSLAMP1".

LAMPE A HAUTE PRESSION:
RISQUE D'EXPLOSION.
DANGER POTENTIEL DE PARTICULES DE VERRE EN CAS
D'ECLATEMENT DE LA LAMPE. A MANIPULER AVEC
PRECAUTION. SE REPORTER AU MODE D'EMPLOI.

AVERTISSEMENT-REPARATEUR:
SE PROTEGER LES YEUX ET LA PEAU DES RADIATIONS
LORS DES REPARATIONS.

This Rollei projector uses a DMD panel. This very sophisticated panel contains 786,432 (RVS2000) / 480,000 (RVS1500) pixels micromirrors. As with any high technology electronic equipment such as large screen TVs, video systems and video cameras, there are certain acceptable tolerances that the equipment must conform to.
This unit has some inactive pixels within acceptable tolerances which may result in inactive dots on the picture screen. This will not affect the picture quality or the life expectancy of the unit.

How to Read this Operation Manual

■ The specifications of the RVS2000 are slightly different from those of the RVS1500, however, you can connect and operate both models in the same manner. This operation manual uses the RVS1500 for the purpose of explanation.

• In this operation manual, the illustration and the screen display are simplified for explanation, and may differ slightly from actual display.

Using the Menu Screen

The menu can be operated to achieve two functions, adjustment and setting. (For setting the menu items, see pages **38** and **39**.)

Operating with the projector
When "PRJ - ADJ" - "Guide LEDs" is set to "On", the buttons used for menu adjustment on the projector light up.

Example: When △, ▽ and the MENU/HELP button light up on the projector, you can use those buttons for operation.

Adjustment buttons (△/▽/◁/▷)

MENU/HELP button

ENTER button — MENU/HELP button

MOUSE/Adjustment button (▲/▼/◀/▶)

ENTER button

RETURN button

Buttons used in this operation

Menu Selections (Adjustments)

Example: Adjusting "Bright".
• This operation can also be performed by using the buttons on the projector.

1 Press ▣ **MENU.**
• The "Picture" menu screen for the se-lected input mode is displayed.

2 Press ▶ or ◀ to display the other menu screen.
• The selected menu item is highlighted.

Button used in this step

Example: "Picture" screen menu for INPUT 1 (RGB) mode

Menu item

IMPORTANT SAFEGUARDS

CAUTION: Please read all of these instructions before you operate this product and save these instructions for later use.

Electrical energy can perform many useful functions. This product has been engineered and manufactured to assure your personal safety. BUT IMPROPER USE CAN RESULT IN POTENTIAL ELECTRICAL SHOCK OR FIRE HAZARDS. In order not to defeat the safeguards incorporated in this product, observe the following basic rules for its installation, use and servicing.

1. Read Instructions
All the safety and operating instructions should be read before the product is operated.

2. Retain Instructions
The safety and operating instructions should be retained for future reference.

3. Heed Warnings
All warnings on the product and in the operating instructions should be adhered to.

4. Follow Instructions
All operating and use instructions should be followed.

5. Cleaning
Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

6. Attachments
Do not use attachments not recommended by the product manufacturer as they may cause hazards.

7. Water and Moisture
Do not use this product near water–for example, near a bath tub, wash bowl, kitchen sink, or laundry tub; in a wet basement; or near a swimming pool; and the like.

8. Accessories
Do not place this product on an unstable cart, stand, tripod, bracket, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the product. Any mounting of the product should follow the manufacturer's instructions, and should use a mounting accessory recommended by the manufacturer.

9. Transportation
A product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.

10. Ventilation
Slots and openings in the cabinet are provided for ventilation to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer's instructions have been adhered to.

11. Power Sources
This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.

12. Grounding or Polarization
This product is provided with one of the following types of plugs. If the plug should fail to fit into the power outlet,
please contact your electrician.
Do not defeat the safety purpose of the plug.
a. Two-wire type (mains) plug.
b. Three-wire grounding type (mains) plug with a grounding terminal.
This plug will only fit into a grounding type power outlet.

13. Power-Cord Protection
Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.

14. Lightning
For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the cable system. This will prevent damage to the product due to lightning and power-line surges.

15. Overloading
Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.

16. Object and Liquid Entry
Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

17. Servicing
Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

18. Damage Requiring Service
Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
a. When the power-supply cord or plug is damaged.
b. If liquid has been spilled, or objects have fallen into the product.
c. If the product has been exposed to rain or water.
d. If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions, as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal operation.
e. If the product has been dropped or damaged in any way.
f. When the product exhibits a distinct change in performance, this indicates a need for service.

19. Replacement Parts
When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

20. Safety Check
Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

21. Heat
This product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

Be sure to read the following safeguards when setting up your projector.

Caution concerning the lamp unit

■ Potential hazard of glass particles if lamp ruptures. In case of lamp rupture, contact your nearest Rollei Authorized Projector Dealer or Service Center for a replacement. See "Replacing the Lamp" on page **55**.
Caution concerning the setup of the projector

■ For minimal servicing and to maintain high image quality, Rollei recommends that this projector be installed in an area free from humidity, dust and cigarette smoke. When the projector is subjected to these environments, the vents and lens must be cleaned more often. As long as the projector is regularly cleaned, use in these environments will not reduce the overall operation life of the unit. Internal cleaning should only be performed by a Rollei Authorized Projector Dealer or Service Center.

Do not set up the projector in places exposed to direct sunlight or bright light.

■ Position the screen so that it is not in direct sunlight or room light. Light falling directly on the screen washes out the colors, making viewing difficult. Close the curtains and dim the lights when setting up the screen in a sunny or bright room.

Caution regarding placing of the projector.

■ Place the projector on a level site within the adjustment range of the adjustment foot.
Do not turn the projector upside down immediately after putting into standby mode.

■ This may cause burns due to rise in temperature of the lamp unit cover.

Warning about placing the projector in a high position

■ When placing the projector in a high position, be sure to secure it carefully to avoid personal injury caused by the projector falling down.

Do not subject the projector to hard impact and/or vibration.

■ Take care with the lens so as not to hit or damage the surface of the lens.

Rest your eyes occasionally.

■ Continuously watching the screen for long hours will cause eye strain. Be sure to occasionally rest your eyes.

Avoid locations with extremes of temperature.

■ The operating temperature of the projector is from 41°F to 95°F (+5°C to +35°C).
■ The storage temperature of the projector is from –4°F to 140°F (–20°C to +60°C).

Do not block the exhaust and intake vents.

■ Allow at least 11 $^{13}/_{16}$ inches (30 cm) of space between the exhaust vent and the nearest wall or obstruction.
■ Be sure that the intake vent and the exhaust vent are not obstructed.
■ If the cooling fan becomes obstructed, a protection circuit will automatically put the projector into standby mode to prevent overheat damage. This does not indicate a malfunction. (See pages **53** and **54**.) Remove the projector power cord from the wall outlet and wait at least 10 minutes. Place the projector where the intake and exhaust vents are not blocked, plug the power cord back in and turn on the projector. This will return the projector to the normal operating condition.
■ When turning off the projector, the cooling fan runs to decrease the internal temperature for a while. Unplug the power cord after the cooling fan stops. The period the cooling fan runs will vary, depending on the circumstances and the internal temperature.

8

Caution regarding transportation of the projector

■ When transporting the projector, be sure not to subject it to hard impact and/or vibration, as this can result in damage. Take extra care with the lens. Before moving the projector, be sure to unplug the power cord from the wall outlet, and disconnect any other cables connected to it.
■ Do not carry the projector by holding the lens.
■ When transporting the projector, be sure to place the projector in the supplied soft case. (See page **11**.)

Other connected equipment

■ When connecting a computer or other audio-visual equipment to the projector, make the connections AFTER unplugging the power cord of the projector from the AC outlet and turning off the equipment to be connected.
■ Please read the operation manuals of the projector and the equipment to be connected for instructions on how to make the connections.

Using the projector in other countries

■ The power supply voltage and the shape of the plug may vary depending on the region or country you are using the projector in. When using the projector overseas, be sure to use an appropriate power cord for the country you are in.

Temperature monitor function

■ If the projector starts to overheat due to setup problems or blockage of the air vents, "" and " TEMP. " will illuminate in the lower left corner of the picture. If the temperature continues to rise, the lamp will turn off, the temperature warning indicator on the projector will blink, and after a 90-second cooling-off period the projector will enter standby mode. Refer to "Maintenance Indicators" on page **53** for details.

Info

• The cooling fan regulates the internal temperature, and its performance is automatically controlled. The sound of the fan may change during projector operation due to changes in the fan speed. This does not indicate malfunction.
• Do not unplug the power cord during projection or cooling fan operation. This can cause damage due to rise in internal temperature, as the cooling fan also stops.

9

How to Access the PDF Operation Manuals

PDF operation manuals in several languages are included in the CD-ROM, so that you can work with the projector, even if you do not have this manual. To utilize these manuals, you need to install Adobe Reader on your computer (Windows or Macintosh).

Please download Adobe Reader from the Internet (http://www.adobe.com).

Accessing the PDF Manuals

For Windows:
① Insert the CD-ROM in the CD-ROM drive.
② Double click the "My Computer" icon.
③ Double click the "CD-ROM" drive.
④ Double click the language (name of the folder) that you want to view.
⑤ Double click the "RVS" pdf file to access the projector manuals.

For Macintosh:
① Insert the CD-ROM in the CD-ROM drive.
② Double click the "CD-ROM" icon.
③ Double click the language (name of the folder) that you want to view.
④ Double click the "RVS" pdf file to access the projector manuals.

✎ Note

• If the desired pdf file cannot be opened by double clicking the mouse, start Adobe Reader first, then specify the desired file using the "File", "Open" menu.

📝 Note

• This optional accessory may not be available depending on the region. Please check with your nearest Rollei Authorized Projector Dealer or Service Center.

Carrying the Projector

Using the Soft Case
📖 Info

• Be sure the projector has cooled down sufficiently before placing it in the case.
• This soft case is only for storing and carrying the projector.
• Shipping the projector in the soft case as a parcel may cause damage to the projector. If you send the projector in the carrying case as a parcel, be sure to place it in a sturdy case and with enough shock absorbing material to avoid any damage.

Tying the Cables

Tie the cable using the supplied cable ties.
Power cord   RGB/USB cable
📝 Note

• You cannot store the supplied cables within the soft case. When transporting the projector, prepare a bag for these cables.

• For undoing an operation or returning to the previous display.

32 FREEZE button
For freezing images.

29 AV MUTE button
For temporarily displaying the black screen and turning off the sound.

Inserting the Lithium Battery

1 While pressing the tab (①), pull the battery holder (②).

2 Pull the battery holder.

3 Insert the supplied lithium battery (CR2025).
• Insert the lithium battery with the + side of the battery facing the + mark of the battery holder.

4 Insert the battery holder into the remote control.

+ mark

Usable Range

The remote control can be used to control the projector within the ranges shown in the illustration.

> ✎ **Note**
> • The signal from the remote control can be reflected off a screen for easy operation. However, the effective distance of the signal may differ depending on the screen material.

When using the remote control

- Be sure not to drop, expose to moisture or high temperature.
- The remote control may malfunction under a fluorescent lamp. In this case, move the projector away from the fluorescent lamp.

Notes the Use of the Lithium Battery

CAUTION The battery used in this device may present a risk of fire of chemical burn if mistreated. Do not recharge, disassemble, heat above 212°F (100°C) , or incinerate. Replace battery with the type CR2025 only. Use of another battery may present a risk of fire or explosion. Dispose of used battery promptly. Keep away from children. Do not disassemble and do not dispose of in fire.

- See page **2** for caution on the lithium battery.
- Do not short-circuit, recharge, disassemble, or heat the lithium battery.
- Should the lithium battery leak, wipe the battery compartment clean, and then insert a new battery.
Replacement of lithium battery
- Replace with a new battery (CR2025) if remote control operation often fails.
- When disposing the battery, follow the recycling or disposal regulations in your community.

15

Quick Start

This section shows the basic operation (projector connecting with the computer). For details, see the page described below for each step.

Setup and Projection

In this section, connection of the projector and the computer is explained using one example.

5 INPUT button

4 ENTER button

3 ON/STANDBY button
6

4 HEIGHT ADJUST button

4 Zoom knob

4 Focus ring

3 ON/STANDBY button
6

5 INPUT 1 button

4 ENTER button

---

1. Place the projector facing a wall or a screen
➡ P. **18**

---

2. Connect the projector to the computer and plug the power cord into the AC socket of the projector

When connecting equipment other than the computer, see pages **24** and **25**.

➡ PP. **21–25**

---

3. Press the ON/STANDBY button to turn the projector on

On the projector   On the remote control

ON/STANDBY

➡ P. **26**

16

4. Adjust the projected image with the Setup Guide

1 After the projector turns on, the Setup Guide appears. (When "Setup Guide" is set to "On". → page **45**)

- Refer to the Setup Guide screen to adjust the focus, angle and zoom.
- Press ⊙ENTER to finish the Setup Guide.

2 Focus (See page **27**.)
- Bring the projected image into focus using the focus ring.

Focus ring

3 Angle (See page **28**.)
- Adjust the projector angle using the HEIGHT ADJUST button.

HEIGHT ADJUST button

4 Zoom (See page **28**.)
- Adjust the projected image size using the zoom knob.

zoom in

Zoom knob

zoom out
5 After adjusting the focus, height and screen size, press ⊙ENTER to finish the Setup Guide.

➡ P. **27**

5. Select the INPUT mode

Select the "INPUT 1" using the INPUT button on the projector or 🖳 INPUT 1 on the remote control.

On the projector
INPUT

On the remote control
INPUT 1

On-screen display (RGB)
🖳 INPUT 1
RGB

- When pressing the INPUT button on the projector, input mode switches in order of ↱INPUT1↔INPUT2↔INPUT3↰.
- When using the remote control, press the 🖳 INPUT 1/🖳 INPUT 2/🖳 INPUT 3 button to switch the INPUT mode.

➡ P. **29**

6. Turn the Power off

Press the ON/STANDBY button, then press that button again while the confirmation message is displayed, to put the projector into standby mode.

On the projector
ON/STANDBY

On the remote control
ON STANDBY

On-screen Display

⏻ Enter STANDBY mode?
Yes : Press Again
No : Please Wait
- While the cooling fan is running, the Adjustment buttons blinks. (When "Guide LEDs" is set to "On". → page **48**)
- Unplug the power cord from the AC outlet after the cooling fan stops.

➡ P. **26**

17

Setting up the Projector

Setting up the Projector

Position the projector perpendicular to the screen with the projector's feet flat and level to achieve an optimal image.

✎ **Note**
• For an optimal image, position the screen so that it is not in direct sunlight or room light. Light falling directly on the screen washes out the colors, making viewing difficult. Close the curtains and dim the lights when setting up the screen in a sunny or bright room.

Standard Setup (Front Projection)
■ Place the projector at the required distance from the screen according to the desired picture size. (See page **19**.)

Example of standard setup

Side View

Screen

H

90°   Lens center

L
Projecting a Reversed Image

Projection from behind the Screen
■ Place a translucent screen between the projector and the audience.
■ Reverse the image by setting "Rear" in the "PRJ Mode" menu. (See page **46**.)
Projection Using a Mirror
■ Place a mirror (normal flat type) in front of the lens.
■ When the translucent screen is placed between the mirror and audience, set to "Front" in the "PRJ Mode" menu. (See page **46**.)
■ When the mirror is placed on the audience side, set to "Rear" in the "PRJ Mode" menu. (See page **46**.)

Translucent screen

Audience

Set to "Front"   Set to "Rear"

Mirror

Audience   Translucent   Audience
            screen   Mirror
📖 **Info**
• When using a mirror, be sure to carefully position both the projector and the mirror so the light does not shine into the eyes of the audience.

Screen Size and Projection Distance (RVS2000)

NORMAL Mode (4:3)

Picture (Screen) size			Projection distance [L]		Distance from the bottom of the image to the lens center [H]
Diag. [χ]	Width	Height	Minimum [L1]	Maximum [L2]	
270″ (686 cm)	549 cm (216″)	411 cm (162″)	9.9 m (32′ 5″)		−50.9 cm (−20 ³/₆₄″)

84″ (213 cm)	186 cm (73″)	105 cm (41″)	3.3 m (11′ 0″)	3.9 m (12′10″)	−34.7 cm (−13 ²¹/₃₂″)	±17.4 cm (±6 ⁵⁵/₆₄″)
72″ (183 cm)	159 cm (63″)	90 cm (35″)	2.9 m (9′ 5″)	3.3 m (11′ 0″)	−29.7 cm (−11 ⁴⁵/₆₄″)	±14.9 cm (±5 ⁵⁷/₆₄″)
60″ (152 cm)	133 cm (52″)	75 cm (29″)	2.4 m (7′10″)	2.8 m (9′ 2″)	−24.8 cm (−9 ³/₄″)	±12.5 cm (±4 ²⁹/₃₂″)
40″ (102 cm)	89 cm (35″)	50 cm (20″)	1.6 m (5′ 3″)	1.9 m (6′ 1″)	−16.5 cm (−6 ¹/₂″)	±8.3 cm (±3 ¹⁷/₆₄″)
30″ (76 cm)	66 cm (26″)	37 cm (15″)	1.2 m (3′11″)	1.4 m (4′ 7″)	−12.4 cm (−4 ⁷/₈″)	±6.2 cm (±2 ²⁹/₆₄″)

χ: Picture size (diag.) (in/cm)
L: Projection distance (m/ft)
L1: Minimum projection distance (m/ft)
L2: Maximum projection distance (m/ft)
H: Distance from the bottom of the image to the lens center (cm/in)
S: Adjustable range of image position (cm/in)   See page **43**.

The formula for picture size and projection distance

[m/cm]
$L1 (m) = 0.03985χ$
$L2 (m) = 0.04649χ$
$H (cm) = -0.41299χ$
$S (cm) = ±0.20754χ$

[Feet/inches]
$L1 (ft) = 0.03985χ / 0.3048$
$L2 (ft) = 0.04649χ / 0.3048$
$H (in) = -0.41299χ / 2.54$
$S (in) = ±0.20754χ / 2.54$

✎ **Note**

• There may be an error of ±3% in the above values.
• Values with a minus (-) sign indicate that the lens center is lower than the bottom of the projected image.

• Values with a minus (-) sign indicate that the lens center is lower than the bottom of the projected image.
Connections

INPUT Terminals and Connectable Main Equipment

INPUT 1 terminal
■ Connecting the computer. (See page **23**.)
■ Connecting video equipment with component output terminal (DVD player, DTV decoder, DVD recorder with hard disc, etc.). (See page **24**.)

INPUT 2 terminal
Connecting video equipment with S-video output terminal (VCR, DVD player, etc.). (See page **24**.)

INPUT 3 terminal
Connecting video equipment without S-video output terminal. (See page **25**.)

USB ⋅⟵ | INPUT1 ▢ | INPUT2 ⊷ | INPUT3 ⊖ | INPUT ⊖

COMPUTER/COMPONENT | S-VIDEO | VIDEO | AUDIO

USB terminal
Connecting the computer. (See page **33**.)

AUDIO INPUT terminal
Connecting an audio cable (Shared audio input terminal for INPUT 1, 2 and 3.) (See pages **23**, **24** and **25**.)

Samples of Cables for Connection

- For more details of connection and cables, refer to the opeation manual of the connecting equipment.
- You may need other cables or connectors not listed above.

Equipment	Input Signal	Cable	Terminal on the projector
Computer	RGB video	RGB/USB cable (supplied)	INPUT1 COMPUTER/COMPONENT
	Computer audio	ø3.5 mm stereo audio cable	AUDIO INPUT AUDIO
Audio-visual equipment	Component video	3 RCA (Component) to 15-pin D-sub cable (commercially available)	INPUT1 COMPUTER/COMPONENT

22

Connecting to a Computer

Before connecting, be sure to unplug the power cord of the projector from the AC outlet and turn off the devices to be connected. After making all connections, turn on the projector and then the other devices. When connecting a computer, be sure that it is the last device to be turned on after all the connections are made.

Be sure to read the operation manuals of the devices to be connected before making connections.

To INPUT1 terminal

To AUDIO INPUT terminal

* ø3.5 mm stereo or mono audio cable (commercially available)
RGB/USB Cable

* When using the ø3.5 mm mono audio cable, the volume level will be half of when using the ø3.5 mm stereo audio cable.

✏ Note

- When connecting with USB cable, you can use the remote control as a mouse for controlling cursor. See page **33**.
- See page **59** "Computer Compatibility Chart" for a list of computer signals compatible with the projector. Use with computer signals other than those listed may cause some of the functions to not work.
- A Macintosh adaptor may be required for use with some Macintosh computers. Contact your nearest Macintosh Dealer.
- **Depending on the computer you are using, an image may not be projected unless the signal output setting of the computer is switched to the external output.** Refer to the computer operation manual for switching the computer signal output settings.

"Plug and Play" function (when connecting to a 15-pin terminal)

- ■ This projector is compatible with VESA-standard DDC 1/DDC 2B. The projector and a VESA DDC compatible computer will communicate their setting requirements, allowing for quick and easy setup.
- ■ Before using the "Plug and Play" function, **be sure to turn on the projector first and the connected computer last.**

✏ Note

- The DDC "Plug and Play" function of this projector operates only when used in conjunction with a VESA DDC compatible computer.

Connecting to Video Equipment

The projector has a COMPUTER/COMPONENT terminal, an S-VIDEO terminal and a VIDEO terminal for video input. See the illustration below to connect with the audio-visual equipment.
The image quality is highest in order of the component signal, the S-video signal and the video signal. If your audio-visual equipment has a component output terminal, use the COMPUTER/COMPONENT terminal (INPUT1) on the projector for video connection.

Composite video cable (commercially available)
✎ **Note**
• ø3.5 mm minijack to RCA audio cable (commercially available) is required for audio input.

Connecting the Power Cord

Plug the supplied power cord into the AC socket on the side of the projector.

AC socket

Turning the Projector On/Off

Turning the Projector on

Before performing the steps in this section, connect any equipment that you use with the projector. (See pages **23**, **24** and **25**.) Also connect the power cord to the projector. (See page **25**.)

Press ⏻ON/STANDBY on the projector or ⏻ON/STANDBY on the remote control.

- When the lamp is warming up, the Adjustment buttons blink in a clockwise direction. (When "Guide LEDs" is set to "On". ➔ page **48**)
- When System Lock is set, the keycode input box appears. Enter the right keycode to start projection. See page **49** for details.

📝 Note

- **About the Lamp Indicator**
  The lamp indicator lights up or blinks, indicating the status of the lamp.
  - **Green:** The lamp is ready.
  - **Blinking in green:** The lamp is warming up or shutting down.
  - **Red: The lamp is shut down abnormally or the lamp should be replaced.**
- When switching on the projector, a slight flickering of the image may be experienced within the first minute after the lamp has been illuminated. This is normal operation as the lamp's control circuitry is stabilising the lamp output characteristics. It should not be regarded as faulty operation.
- If the projector is put into standby mode and immediately turned on again, the lamp may take some time to start projection.
Turning the Power off (Putting the Projector into Standby Mode)

1 **Press ⏻ON/STANDBY on the projector or ⏻ON/STANDBY on the remote control, then press that button again while the confirmation message is displayed, to put the projector into standby mode.**

2 **Unplug the power cord from the AC outlet after the cooling fan stops.**
- When the projector is turned off, the Adjustment buttons blink in a counterclockwise direction. (When "Guide LEDs" is set to "On". ➔ page **48**)

📖 Info

- English is the factory default language. If you want to change the on-screen display to another language, change the language according to the procedure on page **46**.

No : Please Wait

▼

Shutting Down. Please Wait.

📖 Info

- Do not unplug the power cord during projection or cooling fan operation. This can cause damage due to rise in internal temperature, as the cooling fan also stops.

Image Projection

About the Setup Guide

After turning on the projector, the Setup Guide screen appears to assist you with projector setup.

Guidance items
1 FOCUS
2 HEIGHT ADJUST
3 ZOOM

Adjust the projector by following the illuminated buttons or Setup Guide indicators.

Press ⊙ENTER to turn off the Setup Guide screen.

✏ Note

• The Setup Guide screen automatically highlights the items in order of
  ┌→1 FOCUS → 2 HEIGHT ADJUST → 3 ZOOM → 4 ENTER┐.
• You can adjust the focus, height or zoom anytime you want, regardless of the selection on the Setup Guide.
• If you do not want to display the Setup Guide for the next time, set "Menu" - "SCR - ADJ" - "Setup Guide" to "Off". (See page **45**.)

Adjusting the Projected Image

1 Adjusting the Focus

You can adjust the focus with the focus ring on the projector.

Rotate the focus ring to adjust the focus while watching the projected image.
Focus ring

Image Projection (Continued)

2 Adjusting the Height

The height of the projector can be adjusted using the adjustment feet at the front and rear of the projector.

When the screen is in a higher position than the projector, the projection image can be made higher by adjusting the projector.

1 **Lift the projector to adjust its height while pressing the HEIGHT ADJUST button.**

2 **Remove your hands from the HEIGHT ADJUST button of the projector after its height has been finely adjusted.**
• The angle of projection is adjustable up to 7.5 degrees from the surface on which the projector is placed.

3 **Use the rear adjustment foot to make the projector level.**
• The projector is adjustable ±1 degree from the standard position.

✏ **Note**
• When adjusting the height of the projector, trapezoidal distortion occurs. When "Auto Keystone" is set to "On", keystone correction functions automatically to correct trapezoidal distortion. When you want to adjust the automatically corrected image, use the manual keystone correction. (See page **44**.)
📖 **Info**
• Do not apply too much pressure on the projector when the front adjustment foot comes out.
• When lowering the projector, be careful not to get your fingers caught in the area between the adjustment foot and the projector.

HEIGHT ADJUST button

Rear adjustment foot

3 Adjusting the Screen Size

You can adjust the screen size using the zoom knob on the projector.

zoom in
zoom out
Zoom Knob
Switching the Input Mode

Select the appropriate input mode for the connected equipment.

Press⊟ INPUT 1, ⊡ INPUT 2 or ⊟INPUT 3 on the remote control to select the input mode.

- When pressing INPUT (△/▽) on the projector, input mode switches in order of
  →INPUT1↔INPUT2↔INPUT3→.
- When "Auto Search" is set to "On", INPUT (△/▽) on the projector functions as the Auto Search buttons. (See page **47**.)

◆ SEL./ADJ.   ◀ ENTER   ■ END

Description of Items

Selectable items	Description
2D Progressive	Useful to display fast-moving images such as sports and action films.
3D Progressive	Useful to display relatively slow-moving images such as drama and documentary more clearly.
Film Mode	Reproduces the image of film source* clearly. Displays the optimized image of film transformed with three-two pull down (NTSC and PAL60Hz) or two-two pull down (PAL50Hz and SECAM) enhancement to progressive mode images.

* The film source is a digital video recording with the original encoded as is at 24 frames/second. The projector can convert this film source to progressive video at 60 frames/second with NTSC and PAL60Hz or at 50 frames/second with PAL50Hz and SECAM to play back a high-definition image.

✎ Note

• In NTSC or PAL60Hz, even if the 3D Progressive mode has been set, the three-two pull down enhancement will be enabled automatically when the film source has been entered.
• When the image is blurred or noisy, switch to the optimal mode.
• When using progressive inputs, inputs are directly displayed so that 2D Progressive, 3D Progressive and Film Mode cannot be selected.

◆ SEL./ADJ.   ◀ ENTER   ■ END
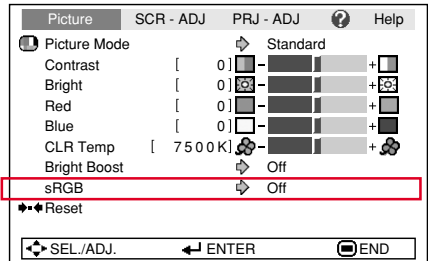

✎ Note

• An international standard of color reproduction regulated by the IEC (International Electrotechnical Commission). As the fixed color area has been decided by the IEC, the images are displayed in a natural tint based on an original image, when "sRGB" is set to "ON".
• For additional information about the sRGB function, visit "http://www.srgb.com/".
• You cannot set the items, "Red", "Blue", "CLR Temp", "Bright Boost", when "sRGB" is set to "On".

📖 Info

• When "sRGB" is set to "On", the projected image may become dark, but this does not indicate a malfunction.

42

Adjusting the Projected Image ("SCR - ADJ" menu)

You can adjust the projected image and on-screen display to your preferences using the "SCR - ADJ" menu.

Setting the Resize Mode

Menu operation → Page **38**

Picture	SCR - ADJ	PRJ - ADJ	?	Help
Resize			Normal	
Image Shift	[0]	–	+	
Keystone	[0]	–	+

◀ button   ▶ button
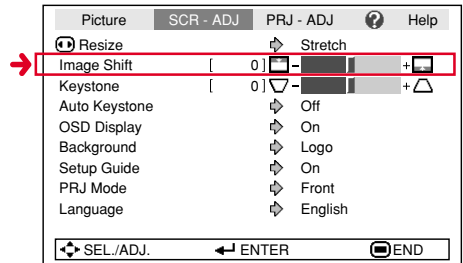

✎ Note

• You cannot set this item when "Resize" is set to "Normal".
• To reset this function, select "0".
• When adjusting the image shift, "Keystone" is set to "0" and "Auto Keystone" is set to "Off".

Useful Features

43

Keystone Correction

When the image is projected either from the top or from the bottom towards the screen at an angle, the image becomes distorted trapezoidally. The function for correcting trapezoidal distortion is called Keystone Correction.

Auto Keystone Correction

Set "Auto Keystone" on the "SCR - ADJ" menu to "On".

Menu operation → Page **38**

Manual Keystone Correction

Set "Auto Keystone" on the "SCR - ADJ" menu to "Off", and select "Keystone", then adjust with the slide bar.

Menu operation → Page **36**

✎ Note

- You can adjust the items with check marks (✔).
- Some items in the Help menu may not appear, depending on the projected image.
- **If the problem is not solved, refer to "Troubleshooting". (see pages 60 and 61)**

Useful Features

51

Maintenance

Cleaning the projector
- Be sure to unplug the power cord before cleaning the projector.
- The cabinet as well as the operation panel is made of plastic. Avoid using benzene or thinner, as these can damage the finish on the cabinet.
- Do not use volatile agents such as insecticides on the projector.
  Do not attach rubber or plastic items to the projector for long periods.
  The effects of some of the agents in the plastic may cause damage to the quality or finish of the projector.

Mild detergent

Mild detergent diluted with water

Wax   Thinner
- Wipe off dirt gently with a soft flannel cloth.
- When the dirt is hard to remove, soak a cloth in a mild detergent diluted with water, wring the cloth well and then wipe the projector.
  Strong cleaning detergents may discolor, warp or damage the coating on the projector. Make sure to test on a small, inconspicuous area on the projector before use.

Cleaning the lens
- Use a commercially available blower or lens cleaning paper (for glasses and camera lenses) for cleaning the lens. Do not use any liquid type cleaning agents, as they may wear off the coating film on the surface of the lens.
- As the surface of the lens can easily get damaged, be sure not to scrape or hit the lens.
Cleaning the exhaust and intake vents
- Use a vacuum cleaner to clean dust from the exhaust vent and the intake vent.
Maintenance Indicators

■ The warning lights (ON/STANDBY button, lamp indicator and temperature warning indicator) on the projector indicate problems inside the projector.
■ If a problem occurs, either the temperature warning indicator or the lamp indicator will illuminate red, and the projector will enter standby mode. After the projector has entered standby mode, follow the procedures given below.

ON/STANDBY button

Lamp indicator

Temperature warning indicator
About the temperature warning indicator

☒ TEMP.

If the temperature inside the projector increases, due to blockage of the air vents, or the setting location, " TEMP. " will illuminate in the lower left corner of the picture. If the temperature keeps on rising, the lamp will turn off and the temperature warning indicator will blink, the cooling fan will run, and then the projector will enter standby mode. After " TEMP. " appears, be sure to perform the measures described on page **54**.

About the lamp indicator

☒ Change The Lamp.

■ When the remaining lamp life becomes 5% or less, ☒ (yellow) and "Change The Lamp" will be displayed on the screen. When the percentage becomes 0%, it will change to ☒ (red), the lamp will automatically turn off and then the projector will automatically enter standby mode. At this time, the lamp indicator will illuminate in red.
■ **If you try to turn on the projector a fourth time without replacing the lamp, the projector will not turn on.**

Maintenance Indicators (Continued)

Maintenance indicator			Problem	Cause	Possible Solution
	Normal	Abnormal			
Tempera-ture warning indicator	Off	Red on (Standby)	The internal temperature is abnormally high.	• Blocked air intake	• Relocate the projector to an area with proper ventilation. (see page **8**)
				• Cooling fan breakdown • Internal circuit failure • Clogged air intake	• Take the projector to your nearest Rollei Authorized Projector Dealer or Service Center (see page **62**) for repair.
Lamp indicator	Green on (Green blinks when the lamp is warming up.)	Red on	The lamp does not illuminate.	• The lamp is shut down abnormally.	• Disconnect the power cord from the AC outlet, and then connect it again.
			Time to change the lamp.	• Remaining lamp life becomes 5% or less.	• Carefully replace the lamp. (See page **56**.) • Take the projector to your nearest Rollei Authorized Projector Dealer or Service Center (see page **62**) for repair. • Please exercise care when replacing the lamp.
		Red on (Standby)	The lamp does not illuminate.	• Burnt-out lamp • Lamp circuit failure	
ON/ STANDBY button	Green on/ Red on	Red blinks	The power indicator blinks in red when the projector is on.	• The lamp unit cover is open.	• Securely install the cover. • If the power indicator blinks in red even when the lamp unit cover is securel installed, contact your nearest Rollei Authorized Projector Dealer or Service Center (see page **62**) for advice.

📖 **Info**

• If the temperature warning indicator illuminates, and the projector enters standby mode, follow the possible solutions above and then wait until the projector has cooled down completely before plugging in the power cord and turning the power back on. (At least 10 minutes.)
• If the power is turned off for a brief moment due to power outage or some other cause while using the projector, and the power supply recovers immediately after that, the lamp indicator will illuminate in red and the lamp may not be lit. In this case, unplug the power cord from the AC outlet, replace the power cord in the AC outlet and then turn the power on again.
• If you want to clean the air vents during projector operation, be sure to press ⊙ON/STANDBY on the projector or ⊙ON/STANDBY on the remote control and put the projector into standby mode. After the cooling fan has stopped, clean the vents.
• The cooling fan keeps the internal temperature of the projector constant and this function is controlled automatically. The sound of the cooling fan may change during operation because the fan speed may change and this is not a malfunction.
• Do not unplug the power cord after the projector has entered standby mode and while the cooling fan is running. The cooling fan runs for about 90 seconds.

Regarding the Lamp

Lamp

■ It is recommended that the lamp (sold separately) be replaced when the remaining lamp life becomes 5% or less, or when you notice a significant deterioration in the picture and color quality. The lamp life (percentage) can be checked with the on-screen display. (see page **50**)

■ Purchase a replacement lamp of type RVSLAMP1 from your place of purchase, nearest Rollei Projector Dealer or Service Center.

Caution Concerning the Lamp

■ This projector utilizes a pressurized mercury lamp. A loud sound may indicate lamp failure. Lamp failure can be attributed to numerous sources such as: excessive shock, improper cooling, surface scratches or deterioration of the lamp due to a lapse of usage time.
The period of time up to failure largely varies depending on the individual lamp and/or the condition and the frequency of use. It is important to note that failure can often result in the bulb cracking.

■ When the lamp replacement indicator and on-screen display icon are illuminated, it is recommended that the lamp be replaced with a new one immediately, even if the lamp appears to be operating normally.

■ Should the lamp break, there is also a possibility that glass particles may spread inside of the projector. In such a case, it is recommended you contact your nearest Rollei Authorized Projector Dealer or Service Center to assure safe operation.

■ Should the lamp break, the glass particles may spread inside the lamp cage or gas contained in the lamp may be vented into the room from the exhaust vent. Because the gas in this lamp includes mercury, ventilate the room well if the lamp breaks and avoid all exposure to the released gas. In case of exposure to the gas, consult a doctor as soon as possible.

Replacing the Lamp

• Do not remove the lamp unit from the projector right after use. The lamp will be very hot and may cause burn or injury.

■ **Carefully change the lamp by following the instructions described in this section. * If you wish, you may have the lamp replaced at your nearest Rollei Authorized Projector Dealer or Service Center.**

* If the new lamp does not light after replacement, take your projector to the nearest Rollei Authorized Projector Dealer or Service Center for repair.

Regarding the Lamp (Continued)

Removing and Installing the Lamp Unit

📖 Info

- Be sure to remove the lamp unit using the handle. Be sure not to touch the glass surface of the lamp unit or the inside of the projector.
- To avoid injury to yourself and damage to the lamp, be sure to carefully follow the steps below.
- Do not loosen other screws except for the lamp unit cover and lamp unit.
Optional accessory	Lamp unit RVSLAMP1

1 **Press ⓞ ON/STANDBY on the projector or ⓞ ON/STANDBY on the remote control to put the projector into standby mode.**
- Wait until the cooling fan stops.

⚠ **Warning!**
- Do not remove the lamp unit from the projector right after use. The lamp and parts around the lamp will be very hot and may cause burns or injury.

2 **Disconnect the power cord.**
- Unplug the power cord from the AC socket.
- Leave the lamp until it has fully cooled down (about 1 hour).

3 **Remove the lamp unit cover.**
- Turn the projector over. Loosen the user service screw (①) that secures the lamp unit cover. Remove the lamp unit cover (②).

ON/STANDBY button

AC socket

User service screw (for lamp unit cover)
4 **Remove the lamp unit.**
- Loosen the securing screws from the lamp unit. Hold the lamp unit by the handle and pull it in the direction of the arrow. At this time, keep the lamp unithorizontal and do not tilt it.

Handle

5 **Insert the new lamp unit.**
- Press the lamp unit firmly into the lamp unit compartment. Fasten the securing screws.

Securing screws

6 **Replace the lamp unit cover.**
- Align the tab on the lamp unit cover (①)and place it while pressing the tab (②) to close it. Then tighten the user service screw (③) to secure the lamp unit cover.

Info

- If the lamp unit and lamp unit cover are not correctly installed, the power will not turn on, even if the power cord is connected to the projector.

User service screw (for lamp unit cover)
Resetting the Lamp Timer

Reset the lamp timer after replacing the lamp.

Info

- Make sure to reset the lamp timer only when replacing the lamp. If you reset the lamp timer and continue to use the same lamp, this may cause the lamp to become damaged or explode.
AC socket

1 **Connect the power cord.**
- Plug the power cord into the AC socket of the projector.

ON/STANDBY button

ENTER button

2 **Reset the lamp timer.**
- While simultaneously holding down ⊜MENU, ⊜ENTER and ▽ on the projector, press and ⊙ON/STANDBY on the projector.
- "LAMP 0000H" is displayed, indicating that the lamp timer is reset.

Note

- This projector may not be able to display images from notebook computers in simultaneous (CRT/LCD) mode. Should this occur, turn off the LCD display on the notebook computer and output the display data in "CRT only" mode. Details on how to change display modes can be found in your notebook computer's operation manual.
- When this projector receives 640 × 350 VESA format VGA signals, "640 × 400" appears on the screen.

DTV

Signal	Horizontal Frequency (kHz)	Vertical Frequency (Hz)
480I	15.7	60
480P	31.5	60
540P	33.8	60
576I	15.6	50
576P	31.3	50
720P	45.0	60
1035I	28.1	50
1035I	33.8	60
1080I	28.1	50
1080I	33.8	60

Troubleshooting

Problem	Check	Page
No picture and no sound or projector does not start.	• Projector power cord is not plugged into the wall outlet.	25
	• Power to the external connected devices is off.	–
	• The selected input mode is wrong.	29
	• Cables incorrectly connected to the projector.	23, 24, 25
	• Remote control battery has run out.	14, 15
	• External output has not been set when connecting notebook computer.	23
	• The lamp unit cover is not installed correctly.	56, 57
Sound is heard but no picture appears (or picture is dark).	• Cables incorrectly connected to the projector.	23, 24, 25
	• "Bright" is set to minimum position.	40
Color is faded or poor.	• Image adjustments are incorrectly set.	40
	(Video Input only) • Video input system is incorrectly set.	51
Picture is blurred; noise appears.	• Adjust the focus.	27
	• The projection distance exceeds the focus range.	19
	(Computer Input only) • Perform "Fine Sync" Adjustments ("Clock" Adjustment)	51
	• Perform "Fine Sync" Adjustments ("Phase" Adjustment)	51
	• Noise may appear depending on the computer.	–
Picture appears but no sound is heard.	• Cables incorrectly connected to the projector.	23, 24, 25
	• Volume is set to minimum.	29
An unusual sound is occasionally heard from the cabinet.	• If the picture is normal, the sound is due to cabinet shrinkage caused by room temperature changes. This will not affect operation or performance.	–
Maintenance indicator on the projector illuminates or blinks in red.	• See "Maintenance Indicators".	54

60

Problem	Check	Page
Picture is green on INPUT 1 COMPONENT.	• Change the input signal type setting.	51
Picture is pink (no green) on INPUT 1 RGB.		
Picture is too bright and whitish.	• Image adjustments are incorrectly set.	40
The cooling fan becomes noisy.	• When temperature inside the projector increases, the cooling fan runs faster.	–
The lamp does not light up even after the projector turns on.	• The lamp indicator is illuminating in red. Replace the lamp.	53
The lamp suddenly turns off during projection		
The image sometimes flickers.	• Cables incorrectly connected to the projector or the connected equipment works improperly. • If this happens frequently, replace the lamp.	23, 24, 25, 51, 56
The lamp needs much time to turn on.	• The lamp will eventually need to be changed. While the remaining lamp life draws to a close, replace the lamp.	56
Picture is dark.		

This unit is equipped with a microprocessor. Its performance could be adversely affected by incorrect operation or interference. If this should happen, unplug the Unit and plug it in again after more than 30 seconds.

For Rollei Assistance

If you encounter any problems during setup or operation of this projector, first refer to the "Troubleshooting" section on pages 60 and 61. If this operation manual does not answer your question, please contact the Rollei Service departments listed below.

Specifications

|	
Product type	Projector
Model	RVS2000 / RVS1500
Video system	NTSC3.58/NTSC4.43/PAL/PAL-M/PAL-N/PAL-60/SECAM/DTV480I/DTV480P/DTV540P/DTV576I/DTV576P/DTV720P/DTV1035I/DTV1080I/DTV1080I-50
Display method	Single Chip Digital Micromirror Device™ (DMD™) by Texas Instruments
DMD panel	Panel size: [RVS2000] 0.7" (17.5 mm) (10.5 [H] × 14.0 [W] mm), 1 chip XGA DMD
	[RVS1500] 0.55" (13.7 mm) (8.2 [H] × 10.9 [W] mm), 1 chip SVGA DMD
	No. of dots: [RVS2000] 786,432 dots (1,024 [H] × 768 [V])
	[RVS1500] 480,000 dots (800 [H] × 600 [V])
Lens	[RVS2000] 1–1.16 × zoom lens, F2.80–3.10, f = 25.8–30.0 mm
	[RVS1500] 1–1.16 × zoom lens, F2.60–2.84, f = 19.3–22.6 mm
Projection lamp	150 W DC lamp
Component input signal (INPUT1)	15-pin mini D-sub connector
	Y: 1.0 Vp-p, sync negative, 75 Ω terminated
	P_B: 0.7 Vp-p, 75 Ω terminated
	P_R: 0.7 Vp-p, 75 Ω terminated
Horizontal resolution	[RVS2000] 700 TV lines (DTV720P)
	[RVS1500] 520 TV lines (DTV720P)
Computer RGB input signal (INPUT 1)	15-pin mini D-sub connector
	RGB separate/sync on green type analog input: 0–0.7 Vp-p, positive, 75 Ω terminated
	HORIZONTAL SYNC. SIGNAL: TTL level (positive/negative)
	VERTICAL SYNC. SIGNAL: Same as above
S-video input signal (INPUT 2)	4-pin mini DIN connector
	Y (luminance signal): 1.0 Vp-p, sync negative, 75 Ω terminated
	C (chrominance signal): Burst 0.286 Vp-p, 75 Ω terminated
Video input signal (INPUT 3)	RCA connector: VIDEO, composite video, 1.0 Vp-p, sync negative, 75 Ω terminated
Pixel clock	12–108 MHz
Vertical frequency	45–85 Hz
Horizontal frequency	15–70 kHz
Audio input signal	ø3.5 mm minijack: AUDIO, 0.5 Vrms, more than 22 kΩ (stereo)
Speaker system	2.8 cm round × 1
Rated voltage	AC 100–240 V
Input current	2.0 A
Rated frequency	50/60 Hz
Power consumption	195 W (Standard mode)/177 W (Eco/Quiet mode "On") with AC 100 V
	190 W (Standard mode)/167 W (Eco/Quiet mode "On") with AC 240 V
Power consumption (standby)	4 W (AC 100 V) – 5 W (AC 240 V)
Heat dissipation	730 BTU/hour (Standard mode)/660 BTU/hour (Eco/Quiet mode "On") with AC 100 V
	710 BTU/hour (Standard mode)/630 BTU/hour (Eco/Quiet mode "On") with AC 240 V
Operating temperature	41°F to 95°F (+5°C to +35°C)
Storage temperature	−4°F to 140°F (−20°C to +60°C)
Cabinet	Plastic
I/R carrier frequency	38 kHz
Dimensions (approx.)	9 47/64″ × 2 17/32″ × 4 13/16″ (247 (W) × 64 (H) × 122 (D) mm) (main body only)
	9 47/64″ × 2 23/32″ × 4 13/16″ (247 (W) × 69 (H) × 122 (D) mm) (including adjustment foot and projecting parts)
Weight (approx.)	3.20 lbs. (1.45 kg)
Replacement parts	Lamp unit (Lamp/cage module) (RVSLAMP1), Remote control (RRMCGA361WJSA), Lithium battery, Power cord (QACCVA006WJPZ), RGB/USB cable (QCNWGA047WJPZ), Cable tie (UBNDTA015WJZZ), Soft case (GCASNA016WJZZ), Projector manual CD-ROM (UDSKAA058WJZZ), Operation manual (TINS-B623WJZZ)

As a part of policy of continuous improvement, Rollei reserves the right to make design and specification changes for product improvement without prior notice. The performance specification figures indicated are nominal values of production units. There may be some deviations from these values in individual units.
