Riōriot ™
digital audio player

user's guide

Important Safety Information

Warning

- RISK OF ELECTRIC SHOCK—DO NOT DISASSEMBLE. To avoid potential electric shock, do not disassemble or modify your Rio. No user-serviceable parts are inside. Refer servicing to qualified personnel.
- Do not remove the rechargeable battery from the unit.
- To reduce the chance of shock or injury, do not use or operate your Rio in or near water or wet locations. Do not spill liquid on your Rio.
- Do not use in places exposed to strong magnetic or electrostatic fields (close to TV or speakers). Do not use in places where the humidity is excessively low.
- Never plug the charger/AC adapter into the headphone/USB port. Only plug the charger/AC adapter into the charger port on the bottom of the Rio.

Caution

- Use of headphones while operating a vehicle is not recommended and is illegal in some areas. Be careful and attentive while driving, biking or walking near traffic. Stop listening to your Rio if you find it disruptive or distracting while operating any type of vehicle. To listen to your Rio in the car, use the optional car cassette adapter accessory (not included).
- Listening to music at full power over extended periods of time can damage your hearing. If you experience ringing in your ears, discontinue use.

Table of Contents

Welcome to Rio

Expanded Table of Contents

> ### Tip
> For an overview of the Rio Riot menu system,

< BACK ◆ NEXT >

So, What Does it Do?

WELL, FIRST OF ALL try to imagine what you could do with 20GB of storage space...

That's right, 20 *gigabytes* of your favorite music.

400 albums.*

5,000 songs.*

All in the palm of your hand.

Just connect the Rio to your computer's **USB port**, download your music to the player and you're on your way.

The Rio features a large, backlit graphic **LCD display** so you can easily navigate your way through your massive song list by artist, album or song title.

You can even use the built in **Rio DJ** to hear a 60-minute sampling of your favorite songs, a playlist of just the newest songs on the player, the most/least played songs, only songs from your favorite decade, and much more.

Rather listen to the radio? No problem. An **FM tuner** is built in, with up to eight presets.

Need long battery life? Again, not to worry. The lithium-ion **rechargeable battery** lasts at least 10 hours per charge at 50% volume.

The Rio supports **popular audio formats**, including WMA (up to 192 kbps) and MP3 (up to 320 kbps). Plus you can view and sort your music using ID3 and WMA tags.

The CD-ROM includes USB drivers for **Windows** (98, ME, 2000 or XP) and **Mac OS** (9.0.4 or higher), along with RealJukebox and iTunes to help you manage your music.

So, what are you waiting for? Let's get started...

* How Much Music?
   The example given is for 128 kbps sampling; see for player capacity at various sampling rates.

Tour of the Player

Menu Displays and exits the menu system.

LCD Liquid Crystal Display; see overview on .

Select Makes selections in menus.

Scroll Scrolls up/down through menu choices.

Back Returns to previous menu. Also press to display track info when a song is playing.

Stop Stops playback.

Forward Skips to next song. Press and hold to scan forward.

Backward Skips to previous song. Press and hold to scan backward.

Play/Pause Starts/pauses playback. To save battery life, the player will "sleep" if left in pause or stop for several minutes. Press Play/Pause to wake it up.

Reset Insert a pointed object, such as a paperclip, into this opening to reset the Rio player. Do not use unless the player freezes; e.g., the display is active but the Rio player does not respond for several minutes.

Volume

On - Lock - Off

Volume +/– Adjusts volume level.

Power On/Lock/Off Powers the player on, off or sets it to Lock mode (🔒). In Lock mode, the player is powered on but the keys are locked to prevent accidental operation. Note: "LOCK" appears on the LCD screen when the player is in Lock mode.
Accessories

Headphones   **Carrying Case**   **AC Adapter**   **USB Cable**   **CDs** (Mac & PC)   **Car Cassette Adapter** (Optional)

1 Getting Started   7

Charging the Battery

The Rio has a built-in lithium-ion rechargeable battery that lasts up to 10 hours per charge.

When you first use the player, charge it for at least five hours for maximum battery life. You can use the Rio while it is charging, so go ahead and rip your CDs and load all your music while you're waiting!

1 Connect the supplied AC adapter to the charger port on the bottom of your Rio, as shown.
2 Plug the AC adapter into an electrical outlet and begin charging the battery.
3 When the battery is fully charged, unplug the AC adapter and disconnect it from the Rio.

• The battery charge is indicated on the LCD screen.
• To increase battery life, do not leave your Rio plugged in for extended periods of time after the battery is charged.

E [L O W] F

E [   ] F

AC Adapter

Charger Port

Charging the Battery
Connect the supplied AC Adapter to the charger port, and then plug it into an electrical outlet to charge the battery.

Tip

To prevent damage to the player, never plug the AC adapter into the headphone/USB port! Only plug the AC adapter into the charger port.

NO

YES
Installing the Software

Now you are ready to install the USB driver and music management software to your computer. The supplied CD-ROM will load RealJukebox for Windows or iTunes for Mac. See system requirements below.
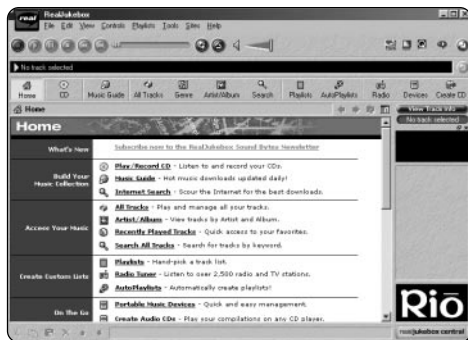

RealJukebox for Windows
Music management software for Windows computers.

PC System Requirements
• Microsoft Windows 98, Me, 2000 or XP
• Pentium 166 with 32 MB RAM
• USB port
• CD-ROM drive
• 35 MB available hard drive space
• Internet connection recommended

iTunes for Mac
Music management software for Apple Macintosh computers.

Mac System Requirements
• Mac OS 9.0.4 or later (9.2.1 recommended)
• 32 MB RAM
• USB port
• CD-ROM drive
• 35 MB available hard drive space
• Internet connection recommended

1 Getting Started

PC Software Installation

Follow these instructions to load the software that enables your PC to recognize the Rio. The installation will also load the RealJukebox music management software.

1 Place the installation CD in your computer's CD-ROM drive. After a few seconds, the Rio splash screen will display:

> **Tip**
> If installation does not start automatically, click "Start > Run...>", and then type "d:\setup32.exe," where "d" is the letter of your computer's CD-ROM drive.

2 Click the "Install RealJukebox" button, and then follow the on-screen instructions.
3 When installation is complete, see to connect the Rio to your PC.

About RealJukebox
RealJukebox will help you:
• Organize digital audio tracks on your computer.
• Organize tracks on your Rio.
• Record (encode) your audio CDs.
• Search for tracks on your computer or on the Internet.
• Create a custom CD—if you have CD burning hardware and your computer supports it.

To learn more about using RealJukebox
• Click the RealJukebox "Help" menu
• Click the "Home" button, scroll to "RealJukebox Help" and then click "Using RealJukebox" and/or "Frequently Asked Questions"
• Visit the Real Web site at "www.real.com"

Mac OS Software Installation

Follow these instructions to load the software that enables your Macintosh computer to recognize the Rio. The installation will also load the iTunes music management software.

1 Place the installation CD in your computer's CD-ROM drive.
2 The CD contents display automatically. To manually display the CD contents, double-click the Rio icon on your computer's desktop.
3 Double-click the "Install" icon.
4 After a few seconds, the Rio splash screen will display:

iTunes   Software Installation CD

        Install iTunes

         User Guide

       Rio Registration

            Exit

5 Click the "Install iTunes" button, and then follow the on-screen instructions.
6 Reboot your computer when the installation is complete.
7 When installation is complete, see to connect the Rio to your Mac.

About iTunes

iTunes music software takes the confusion out of managing your personal music collection. iTunes turns your Mac into a powerful digital jukebox, complete with easy-to-use tools for recording music from audio CDs (simply insert a CD to import music to MP3s), searching and browsing your entire collection, managing playlists, downloading songs to your Rio, and listening to Internet radio stations.

To learn more about using iTunes
• From within the software, click the "Help" menu and choose "iTunes Help"
• Visit the iTunes Web site at "www.apple.com/itunes"

Connecting the Rio to your Computer

Once the software is installed, you are ready to connect the Rio to your PC or Mac.

USB/Headphone Port
Connect one end of the supplied USB cable to the USB/Headphone Port on the Rio...
...and connect the other end to any available USB port on your PC or Mac. When finished, continue with Chapter 2, "Loading Music."

Tip

The Rio Riot USB connection only fits one way. Do not try to force the connection.

Downloading Music from the Internet

You can acquire digital music in MP3 or WMA format in two ways:
1 Downloading from the Internet
2 Encoding/ripping songs from your personal CD collection.

Note: If you already have digital music files stored on your hard drive, feel free to skip to pages 15-16, which demonstrate how to manage your music files and download them to the player.

Downloading Music from the Internet
There are thousands of Web sites that provide digital audio content. Here are a few to get you started:
• www.riohome.com
• www.windowsmedia.com
• www.mp3.com
Simply point your favorite web browser to one of these sites, follow the instructions on the site, and download the music to your computer.

Visit Riohome.com
Go to "www.riohome.com" and click on "Music" to download FREE music, or try the pay per track service to purchase tracks from your favorite artists.

Encoding ("Ripping") Your CDs

Encoding a CD with RealJukebox

1 Insert an audio CD in your PC's CD-ROM drive.
• If Auto-Record is enabled (under "Tools > Preferences > General"), you will see a dialog box asking if you wish to record the CD. If you select "Yes," the RealJukebox software will automatically begin encoding each song on the CD.
• If Auto-Record is not enabled, continue with step 2.
2 In a few moments, the CD automatically opens in Real-Jukebox showing the names of each track on the disc.
3 Click the check box next to each track you wish to encode, or click "Check All" to encode the entire disc.
4 Press the red "Record" button to start encoding.
• Songs will automatically play while they are encoding.

Encoding a CD with iTunes

1 Insert an audio CD in your Mac's CD-ROM drive.
2 In a few moments, the CD automatically opens in iTunes showing the names of each track.
3 Select the check box next to each track you wish to encode (by default, all tracks are checked).
4 Click the "Import" button at the top left of the iTunes window. The checked tracks will be converted to MP3 format.

MP3 Sample Rate Table

SAMPLE RATE (Kbps)	SOUND QUALITY SAMPLE	AVG SIZE (4 min song) in MB	PLAYER CAPACITY SONGS/CDs
64	FM Radio	2	10,000/800
96	FM Radio (Better)	3	6,600/550
128	**Near CD**	**4**	**5,000/400**
160	Near CD (Better)	5	4,000/330
192	CD (Good)	6	3,300/275
256	CD (Better)	8	2,500/200
320	CD (Best)	10	2,000/150

Mega Storage

The Rio Riot can hold over 150 complete albums at the highest possible sample rate!

Setting the Sample Rate

The default sample rate for RealJukebox is 128 kbps, which is the minimum file size for "Near CD" quality, but you can change it based on the size of your music collection and desired sound quality. For example...
• If you have 300 or more CDs to rip, make sure you sample at 160 kbps or lower to allow room on the player and still retain "Near CD" quality.
• If you have 150 or fewer CDs, go ahead and encode at a higher sample rate (256-320 kbps)—you've got the space, you might as well use it!
• For WMA fans, you can get nearly twice the compression for each sample rate at virtually the same sound quality.

Managing Your Music Files

If you have MP3 and WMA files in various folders on your hard drive, the music management software can seek them out and gather them into one unified list. You can then use the software to:

• Play tracks
• Rename tracks
• Clean up your ID3/WMA tags (highly recommended)
• Delete tracks
• Create playlists
• And, of course, download tracks to the player!

Managing Music with RealJukebox

1 Click "File>Import Wizard..." The Import Wizard dialog box appears asking if you would like to search "All Drives" or only specific drives for music files.
2 Click "Start Search" to begin scanning.
3 Click "Finish" to import all your music files into RealJuke-box.
4 Click the "All Tracks" button to view the complete list of tracks. You can then sort the list by Track Name, Artist, Album, Genre, CD Track #, Length, Format, Quality or File Name by clicking on the appropriate header.
5 To clean up your ID3 tags, select a track and click "Edit Track Info."

Managing Music with iTunes

1 The iTunes software will automatically locate all music files during the installation process. To add songs manually, click "File>Add to Library", and then browse to the folder and files you wish to add.
2 All tracks are listed in the main window. You can sort the list by Song, Time, Artist, Album, Genre by clicking on the appropriate header.
3 To clean up your ID3 tags, select a track and click "File/Get Info" to view and change information about the song.

> ### Tip
> ID3 tags are automatically filled in when you encode your CDs with RealJukebox or iTunes. If you need to edit tags manually, the best time to do so is BEFORE you load songs onto the player.

2 Loading Music   **15**

Loading Music to the Player

Loading Tracks with RealJukebox

Follow these steps to load music from your PC to the Rio.

1 Launch the RealJukebox software.
2 Connect the Rio to your PC using the supplied USB cable and power on the player.
3 Click the "All Tracks" button in the RealJukebox main screen to view a list of all music saved on your PC.
4 Shift-click the desired track(s) or press "Ctrl-A" to select all tracks.
5 Click "Copy to > Device" in the right column, or right-click on the selected track(s) and select "Copy to Device."
6 Select the "Rio Riot Digital Audio Player" in the list of devices, then click OK.
• The view changes to the "Devices" window, and the song(s) you selected appear at the bottom of the list. The "Transfer Status" column shows that the files are "Ready to Transfer."
7 Click "Copy Files" in the right column to download the files to the player.
• Progress bars display while the music copies.

Loading Tracks with iTunes

Follow these steps to load music from your Mac to the Rio.

1 Launch the iTunes software.
2 Connect the Rio to your Mac using the supplied USB cable and power on the player.
• The Rio shows up in the iTunes window.
3 Click and drag music files from the desktop to the iTunes window.
• Progress bars display while the music copies.

Overview of Playback Options

The Rio provides a variety of ways to jump quickly to the music you want with the least amount of hassle. The "Play Music" menu gives you seven ways to play:

| Play Music |
| Rio DJ |
| Albums |
| Artists |
| Genre |
| Songs |
| Favorites |
| Playlists |

Rio DJ
The Rio DJ automatically generates playlists of your favorite music. For example, you can hear a 60-minute sampling of just your favorite songs, a collection of the songs you most recently downloaded, only songs from a particular decade, and much more; see .

Albums
To listen to a particular album, see .

Artists
To listen to the works of a particular artist, see .

Genre
To load every song of a particular genre (such as Rock, Jazz or Classical), see .

Songs
To listen to a particular song, see .

Favorites
To listen to just your favorite albums, artists or songs, see .

Playlists
To create custom song lists based on any criteria you wish, see .

Playback Control
You can play, pause, stop, scan and skip forward and backward with the four button playback control.

Tip
To save battery life, the player will "sleep" if left in stop or pause for several minutes. Press PLAY/PAUSE to wake it up.

Instant Music with the Rio DJ

The Rio DJ is a powerful tool that keeps track of everything you play (and don't play) to access your music in seven entertaining ways.

1 Press MENU.
2 Scroll to "Play Music," then press SELECT.
3 Scroll to "Rio DJ," then press SELECT.
4 Scroll to one of the following, then press SELECT:

```
Rio DJ
Entertain Me!
  Play All
  Top Tunes
  New Music
  Memory Lane
  Sounds Of...
  Random Play
```

Entertain Me!
Generates a random mix of your favorite songs.

```
Entertain Me!
Play a mix of music that lasts
about   15 minutes
                        Done
                        Cancel
```

- Scroll to "15 Minutes," then press SELECT. The box will blink to indicate that it is selected.
- Scroll to set how long to play (from 15 minutes to 8 hours, or "Everything"), then press SELECT.
Play All
Generates a playlist of every song on the player.

- Scroll to "Done", then press SELECT. All songs on the player will be loaded into the playlist.

Top Tunes
Generates a playlist of the songs you listen to the most.

- Scroll to "10," then press SELECT.
- Scroll to pick the number of tracks to play (from 10 to 250), then press SELECT.

New Music
Generates a playlist of the files you've most recently downloaded to the player.

- Scroll to "1 day," then press SELECT.
- Scroll to set the time frame (from 1 day to 1 year), then press SELECT.

Memory Lane
Generates a playlist of the songs you've listened to the least in the past day, week, month, etc.

- Scroll to "1 day," then press SELECT.
- Scroll to set the time frame (from 1 day to 1 year), then press SELECT.

Sounds of...
Generates a playlist of all tracks on the player from a given decade or year.

- Scroll to "1940's," then press SELECT.
- Scroll to pick a decade (from the '40s to the '00s) or specific year (from 1950-2010), then press SELECT.

Random Play
Generates a completely random mix of songs.

- Scroll to "15 Minutes," then press SELECT.
- Scroll to set how long to play (from 15 minutes to 8 hours), then press SELECT.

5 Scroll to "Done," then press SELECT to load the playlist.
6 Press SELECT or PLAY to begin playback.

Playing Albums, Artists & Songs

Follow these steps to play a complete album, selected works of a particular artist, or any individual song.

Play an Album
1 Press MENU.
2 Scroll to "Play Music," then press SELECT.
3 Scroll to "Albums," then press SELECT.
4 Scroll to the first letter of the album's name, then press SELECT.
5 Choose from the following:
• To load all albums and tracks that begin with the selected letter, scroll to "Play All Albums/Tracks," then press SELECT.
• To load a single album, scroll to the album's name, then press SELECT.
• To load all tracks on the selected album, scroll to "Play All Tracks," then press SELECT.
• To load a single track from the album, scroll to the track's name, then press SELECT.
6 Press SELECT or PLAY to begin playback of the selected album(s) or track(s).

Edit
Delete
Rename

Creating a Playlist
1 Press MENU.
2 Scroll to "Organize," then press SELECT.
3 Scroll to "My Playlists," then press SELECT.
4 Scroll to "Create," then press SELECT.
5 Think of a name for your playlist. Scroll through the alphabetical matrix and find the first character of your playlist name, then press SELECT.
6 Continue in this manner with each character until you have spelled out the complete playlist name.
• To change case, scroll to the "Uppercase" button, then press SELECT. Turn the Scroll wheel to toggle between "Uppercase" and "Lowercase."
• The "Uppercase" matrix includes numbers, and the "Lowercase" matrix includes symbols.
• To add a space to your playlist name, scroll to the word "space," then press SELECT.
7 When finished, scroll to "Done," then press SELECT.
8 Scroll to "Albums," "Artists," or "Tracks," then press SELECT:

Playlist Name: Timmy's Birthday S__

							Lowercase
a	g	m	s	y	#	/	
b	h	n	t	z	$	?	
c	i	o	u	(	%	!	
d	j	p	v	)	^	-	Done
e	k	q	w	!	&	|
f	l	r	x	@	*	space	Cancel

Add Albums to Playlist
Scroll to the first letter of the album's name, then press SELECT.
• To add all albums and tracks that begin with the selected letter, scroll to "Add All Albums/Tracks," then press SELECT.
• To add a single album, scroll to the album's name, then press SELECT.
• To add all tracks on the album, scroll to "Add All Tracks," then press SELECT.
• To add a single track from the album, scroll to the track's name, then press SELECT.

Add Artists to Playlist
Scroll to the first letter of the artist's name, press SELECT, then scroll to the artist's name, and press SELECT again.
• To add all albums and tracks for the selected artist, scroll to "Add All Albums/Tracks," then press SELECT.
• To add a single album, scroll to the album's name, then press SELECT.
• To add all tracks on the album, scroll to "Add All Tracks," then press SELECT.
• To add a single track, scroll to the track's name, then press SELECT.

Add Tracks to Playlist
Scroll to the first letter of the song's name, then press
SELECT.
*   To add all tracks that begin with the selected letter, scroll
    to "Add All Tracks," then press SELECT.
*   To add a single track, scroll to the track's name, then
    press SELECT.

9   To continue adding tracks, press BACK repeatedly to
    return to the "Add Tracks" menu and repeat Step 8 until
    you have added all desired tracks.
10 When you are finished, press BACK repeatedly until the
    message appears: "You have created the playlist: [playlist
    name]. Do you want to save the changes or exit without
    saving?"
11 Scroll to "Save," then press SELECT to save your playlist.
12 To select and playback your playlist, see .

Tip
The total number of tracks you have added is
displayed in the top right corner of the LCD,
with the message: "There are # tracks in
[playlist name]."

Playlist Options

Editing a Playlist
1 Press MENU.
2 Scroll to "Organize," then press SELECT.
3 Scroll to "My Playlists," then press SELECT.
4 Scroll to "Edit," then press SELECT.
5 Choose from the following:

Add Tracks to Playlist
• Scroll to "Add Tracks," then press SELECT.
• Scroll to the playlist you wish to edit, then press SELECT.
• Follow Steps 8-11 on to add tracks to your playlist.

Delete Tracks from Playlist
• Scroll to "Delete Tracks," then press SELECT.
• Scroll to the desired playlist, then press SELECT.
• Scroll to the track you wish to delete, then press SELECT.
• Scroll to "Delete," then press SELECT to delete the song.

Deleting a Playlist
1 Press MENU.
2 Scroll to "Organize," then press SELECT.
3 Scroll to "My Playlists," then press SELECT.
4 Scroll to "Delete," then press SELECT.
5 Scroll to the playlist you wish to delete, then press SELECT.
6 Scroll to "Delete," then press SELECT to delete the playlist.

Renaming a Playlist
1 Press MENU.
2 Scroll to "Organize," then press SELECT.
3 Scroll to "My Playlists," then press SELECT.
4 Scroll to "Rename," then press SELECT.
5 Scroll to the playlist you wish to rename, then press SELECT.
6 Follow Steps 5-7 on to rename the playlist.
7 Scroll to "Save," then press SELECT.

Selecting a Playlist for Playback
1 Press MENU.
2 Scroll to "Play Music," then press SELECT.
3 Scroll to "Playlists," then press SELECT.
4 Scroll to the desired playlist, then press SELECT.
5 Press SELECT or PLAY to begin playback of the selected playlist.

Scanning for FM Stations

Accessing the FM Tuner
The Rio Riot comes with a built-in FM tuner. Follow these steps to access the FM tuner and scan for stations in your area.
1 Press MENU.
2 Scroll to "Radio," then press SELECT.
3 The "FM Tuner" menu appears on the LCD screen:
• The top of the screen shows the FM frequency band.
• The middle of the screen shows the currently selected FM station, followed by a graphical volume indicator.
• The bottom of the screen shows a list of eight available "Radio Presets"; see page 28 to set and select presets.

Preferences

Scanning for Stations
• Press the FORWARD/BACK-WARD keys to step manually up and down the FM frequency band in 0.1 MHz increments.
• Press and hold the FORWARD/BACKWARD keys to automatically scan to the next available station.

```
88   92   96   100  104  108
105.1 TUNED  ◁ⁱ))|||||||000 FM
                            TUNER
Radio Presets:
Preset 1 – 106.3 FM
Preset 2 – 103.9 FM
Preset 3 – 105.1 FM
Preset 4 – 104.7 FM
Preset 5 –  92.3 FM
```

Returning to the Player Menu
1 Press MENU.
2 Scroll to "Player," then press SELECT.

5 Listening to the Radio

FM Tuner
For a change of pace, select the "Radio" function and listen to your favorite FM presets.

Setting FM Presets

Programming FM Presets

Follow these steps to program up to eight FM presets on the Rio Riot:

1 Press MENU.
2 Scroll to "Radio," then press SELECT. If you are already in Radio mode, skip directly to Step 3.
3 Use the FORWARD/BACKWARD keys to select the desired station on the FM dial.
4 Scroll to any available preset number, then press and hold SELECT until the word "empty" is replaced by the selected radio station.
   OR
5 Press MENU.
6 Scroll to "Organize," then press SELECT.
7 Scroll to "Set Preset," then press SELECT.
8 Scroll to any available preset number, then press SELECT. The preset will appear at the bottom of the Radio screen.
9 Repeat Steps 3-8 to add up to eight presets.

Organize
Select Preset
Set Preset
Clear Preset
Selecting FM Presets

To select an FM preset:

1 From Radio mode, scroll to a programmed preset, then press SELECT.
   OR
2 Press MENU.
3 Scroll to "Organize," then press SELECT.
4 Scroll to "Select Preset," then press SELECT.
5 Scroll to any available preset number, then press SELECT.

Clearing FM Presets

To clear a saved FM preset:

1 From Radio mode, press MENU.
2 Scroll to "Organize," then press SELECT.
3 Scroll to "Clear Preset," then press SELECT.
4 Scroll to the preset number you wish to clear, then press SELECT.

Tip
If you try to save over an existing FM preset, "Overwrite Preset?" will appear on the screen. Select "Save" and press SELECT to overwrite the existing preset.

Equalizer/Audio Settings

The Equalizer menu allows you to fine tune the audio settings for your Rio with a 12 step Bass/Treble setting.

1 Press MENU.
2 Scroll to "Equalizer," then press SELECT.
3 Scroll to "Bass/Treble," then press SELECT:

Bass / Treble
• Scroll to the "Bass" or "Treble" slider, then press SELECT.
• Scroll to set the bass or treble level from -6 to +6, then press SELECT.

4 Scroll to "Done" or "Cancel" then press SELECT.
6 Advanced Settings

Bass & Treble
You can adjust the bass & treble in a 12 dB range.

Tip
To adjust slider controls, such as the Bass/Treble setting, scroll to the desired slider, press SELECT, then use the scroll wheel to move the slider up and down. When finished, press SELECT.

Setting Player Preferences

The Preferences menu allows you to customize your Rio experience, including:

Play Options
Sets Repeat and Random playback settings.

Contrast
Sets the contrast of the LCD screen for different lighting conditions.

Backlight
Turns backlighting on, off, or on for 2-5 seconds.

Power Saver
Sets the player to sleep after a specified time of total inactivity.

Time/Date
Manually sets the time and date.

Information
Displays the current status of the player, including firmware version, total storage space, available storage space and more.

"The" Filter
Allows you to alphabetize lists without the word "The."

  Total Storage: 20 Gbytes
  Free Storage: 19.25 Gbytes
  Supports: MP3 and WMA
  14 Albums and 51 tracks in use
  (room for approx. 4889 more tracks)
                              Done

"The" Filter

"The" Filter gives you the option of displaying songs lists alphabetically without the word "The."

For example, if "The" filter is off, the following songs all appear under the letter "T":

- "The Reflux"
- "The Summer of 1968"
- "The Walls"

Whereas, if "The" filter is on, they appear as:

- "Reflux, The" under "R"
- "Summer of 1968, The" under "S"; and
- "Walls, The" under "W"

To set "The" Filter:

1 From the Preferences menu, scroll to "The" Filter, then press SELECT.
2 Scroll to "Off," then press SELECT.
3 Scroll to set "The" Filter to "Off" or "On," then press SELECT.
4 Scroll to "Done" or "Cancel" then press SELECT.
5 Press BACK to exit the menu system.

FAQs

How do you load music to the Rio?
- The Rio interfaces with your computer through the USB port. You can get digital audio from numerous Internet sites or encode your own digital audio tracks from your audio CDs using the CD-ROM drive on your computer. Use the software included with the Rio to get audio from the Internet, encode tracks from your audio CDs, or download tracks to your Rio.

Can I use the Rio with Windows 95? I have the USB supplement pack.
- No. The Rio USB devices can only be used with Windows 98, Windows ME, Windows 2000 or Windows XP operating systems, or Mac OS 9.0.4 or later. The Rio requires a newer standard of USB that is not available in Windows 95, even with the USB supplement pack.

Where is the serial number located on the Rio?
- The serial number is on the back of the Rio.

The Rio is connected to the USB, why doesn't the computer recognize it?
- First, make sure the Rio RealJukebox software is running and check to make sure the USB cable is fully connected to both the Rio and to the computer. Then, turn the Rio off and back on.

Is the Random menu function truly random?
- No. The Random function uses an algorithm called pseudo-random which is common to all computers. The Rio selects a seed number and then enters a list of predetermined random numbers to play music in a seemingly random order. If the same seed is picked, the Rio may play songs in the same order.

What does the Rio Hold feature do?
- The Hold feature on the Rio locks all buttons and controls except the Power switch. This is useful at times when the Rio may be bumped or jostled. For example, when exercising.

What are the differences between MP3 and WMA?
- If you use the WMA format instead of the MP3 format, you can have comparable quality at about one half the size. Since WMA offers "CD quality" at a smaller file size than MP3, it enables you to store more music on your PC or on your portable player. WMA files are exclusive to the PC.

How can I get the best sound quality when encoding from a CD?
- If you use a significant amount of your computer system's resources with other applications, encoding songs from a CD may result in poor quality recordings. If the song(s) you encode contain abnormalities, such as pops or skips, close down other applications which are running and encode those songs again. The condition of the audio CD—scratches and so on—may effect the quality of the recording as well.

Upgrading the Firmware

How to upgrade the Rio firmware

The Rio features upgradeable firmware. First determine the version of the firmware installed on your Rio, so you do not accidentally "downgrade" your Rio firmware by installing an older version.

1 Press MENU.
2 Scroll to "Preferences," then press SELECT.
3 Scroll to "Information," then press SELECT.
• The firmware version is the first item listed.

Downloading the Firmware Upgrade

1 Go to the Rio Web site at "www.riohome.com"
2 Click the "Support>Product Support" link.
3 Navigate to the Rio Riot PC or Rio Riot Mac links.
4 Select and download the latest firmware upgrade file to your computer.

Upgrading the Rio firmware (PC)

Quit all other applications before running the firmware upgrade. While running the firmware upgrade, do not close the program, turn off the Rio or unplug the USB cable.

1 Connect the Rio to the computer with the USB cable.
2 Slide the Rio power switch to On.
3 Double-click the Rio Riot firmware upgrade file.

4 Click the "Upgrade Now" button on the RioFlasher window.
5 Click Yes.
6 When the upgrade is complete, a check of the firmware version displays the new number.

Upgrading the Rio firmware (Mac)

Do not close the program, turn off the Rio or unplug the USB cable during the upgrade.

1 Connect the Rio to the computer with the USB cable.
2 Slide the Rio power switch to On.
3 Double-click the "iTunes" icon.
4 Select the Rio icon.
5 Click the "Options" button on the iTunes window. The "Rio Settings" window displays.
6 Click the "Upgrade Firmware" button on the "Rio Settings" window.
7 Choose the Rio Riot firmware upgrade file.
8 Click the "Open" button.
9 When the upgrade is complete, a check of the firmware version displays the new number.

Care of your Rio
- Exposure to extreme hot or cold temperatures may cause damage to your Rio or cause it to malfunction. Do not expose your Rio to direct sunlight continuously or leave it in a vehicle with the doors and windows closed. The case may become deformed, discolored or malfunction. Do not use your Rio near open flame.

- If moving from a cold environment to a warm environment, let the Rio's temperature stabilize before operation.
- Keep dirt, sand, dust, and moisture from entering your Rio. Do not use in areas of excessive dust. Do not use in places where the humidity is excessively high.
- Do not drop or subject your Rio to shock.
- If interference occurs close to radios or TVs, move your Rio away from them.
- Do not clean your Rio with solvents, chemicals or abrasive cleaners. If necessary, use a soft cloth to clean your Rio.

Rio Product Support
With every Rio product you receive the following support services:
- Unlimited access to the Rio web-based technical information resources, available 24 hours a day every day at www.riohome.com. Here you will find FAQ files, a knowledgebase search engine, product updates, and other useful tools.
- Unlimited e-mail support for the duration of your Rio product hardware warranty period.
- Access to the latest software updates and enhancements for Rio product via our Web site.

Regulatory Information

Federal Communications Commission (FCC)
The device has been tested and found to comply with limits for a Class B computing device according to the specifications in FCC rules Part 15. Operation is subject to the following two conditions:

1 This device may not cause harmful interference, and
2 This device must accept any interference received, including interference that may cause undesired operation.

If your device needs repairs, you must arrange for the manufacturer to make them if you are to keep the device's FCC registration valid. This equipment, like other electronic equipment, generates and uses radio frequency energy. If not installed and used according to the instructions in this manual, this equipment may cause interference with your radio and television reception. If you think this equipment is causing interference with your radio or television reception, try turning the equipment off and on. If the interference problems stop when the equipment is switched off, then the equipment is probably causing the interference. You may be able to correct the problem by doing one or more of the following:

• Adjust the position of the radio or TV antenna.
• Move the device away from the radio or TV.

If necessary, consult your dealer or an experienced radio or television technician. You may find this booklet helpful: "How to Identify and Resolve Radio and TV Interference Problems" (Stock No. 004-000-00345-4), prepared by the FCC and available from the U.S. Government Printing Office, Washington, DC 20402. See individual devices for FCC ID and registration numbers.

Industry Canada
This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme ‡ la norme NMB-003 du Canada.

CISPR 22
Warning: This equipment is belongs to class A of CISPR 22 recommendation. In a residential environment, it can produce electromagnetic interference. In that case, it can be requested to the user to take some appropriated measures.

EU Declaration of Conformity
We DIAMOND Multimedia Systems Vertriebs GmbH

Moosstrasse 18b

D-82319, Starnberg

GERMANY

On behalf of

SONICblue Incorporated

2841 Mission College Blvd.

Santa Clara, CA 95054 USA

Hereby declare under our sole responsibility that the following product(s) conform to the requirements of the European Parliament Council Directive 1999/5/EC dated 9th March 1999. And to which this declaration is related the product(s) listed are in conformity with the following relevant harmonized European Standards or other normative documents, the references of which have been published in the Official Journal of the European Communities / European Union.

Product (s): Rio Riot

Harmonized Standards:

EN 55022: 1994, A1'95, A2'97 Specification for limits and methods of measurement of radio interference characteristics of Information Technology (IT) equipment.

EN 50082-1: 1998 Electromagnetic Compatibility, Generic Immunity Standard, Part 1. Residential, Commercial and Light Industry.

EN 50332-1: 1999 Maximum sound pressure level measurement methodology and limit considerations. Part 1 General method for "one package equipment."

CEI/IEC 60065: 1998 Audio, Video, and similar electronic apparatus Safety Requirements.

In accordance with the terms of Directive 1999/5/EC, 89/336/EEC, 73/23/EEC and Council Decision 98/482/EC the original signed Declaration is retained by us in the product compliance folder. Upon request photocopies may be available.

✔ One Year Limited Warranty

Our warranty to you

SONICblue Incorporated warrants that your product will be free from defects in materials and workmanship for a period of one year from the date of original retail purchase. If you discover a defect covered by this warranty, we will repair or replace the product at our option using new or remanufactured components. SONICblue Incorporated's liability is limited solely to the repair or replacement of the defective product. This warranty is extended to the original end user purchaser only and is not assignable or transferable to any other party. Any parts or boards removed in the replacement or remanufacture process shall become the property of SONICblue Incorporated. Out of warranty service may also be available for a fee.

How to obtain service under this warranty

To obtain service under this warranty, please contact the dealer from whom you purchased this product or contact SONICblue Customer Care. Contact information for Customer Care is available in this manual or at www.sonicblue.com.

You must deliver the product and the original sale receipt to either the dealer from who you purchased this product or to SONICblue Incorporated in order to obtain service under this warranty. If you return the product to us, you must pay for shipping to SONICblue Incorporated.

Product failures not covered by this warranty

This warranty covers defects in manufacture that arise from correct use of the device. It does not cover damage caused by abuse, misuse, improper modification or repair, moisture, extreme heat or cold, corrosive environments, shipping, or high voltage surges from external sources such as power line, telephone line, or connected equipment. This warranty does not cover wear and tear on covers, housing or wiring. This warranty does not apply to any product with an altered or defaced serial number. Opening or removing the player case will void this warranty.

How to obtain out of warranty service

To obtain out of warranty service, please contact SONICblue Customer Care. Contact information for Customer Care is available in this manual or at www.sonicblue.com.

Out of warranty service is provided for owners of Rio Personal Digital Music Players who:
- Are unable to provide valid proof of purchase for their Rio Personal Digital Music Player.
- Require repair service after the expiration of the original warranty.
- Require service for product failures not covered under the SONICblue Incorporated warranty on this product.

Out of warranty service is limited to the Personal Digital Music Player only and is not available for headphones, memory cards or other accessories. The fee for out of warranty repairs is payable by credit card at the time the service agreement is created and Return Authorization provided. This fee includes all labor, parts needing replacement, and return shipping.

You must deliver the product to SONICblue Incorporated in order to obtain out of warranty service. You must pay for shipping to SONICblue Incorporated. It is recommended that you use a shipping service providing you with tracking capability, because we will not be responsible for items lost in the mail. A Return Authorization number is required for all shipments to SONICblue Incorporated. Please contact our Customer Care Center for more information or to arrange for out of warranty service.

Limits of liability

We are only responsible for the repair of this product. We will not be liable to you or anyone else for any damages that result from the failure of this product or from the breach of any express or implied warranties. These include damage to other equipment, lost data, lost profits, or any consequential, incidental, or punitive damages. In no event will SONICblue Incorporated be liable for any amount greater than the currently suggested retail price of this product.

This written warranty represents the entire warranty agreement between SONICblue Incorporated and you. This warranty is given in lieu of all other warranties, express or implied, including without limitation implied warranties of merchantability and fitness for a particular purpose. This warranty is limited to the term specified above. No warranties, either express or implied, will apply after this period. This warranty may not be altered in any way other than in writing by an officer of SONICblue Incorporated. This warranty gives you specific legal rights and you may also have other rights, which vary, from state to state. Some states limit what warranties may be excluded as well as how long an implied warranty lasts, so the above limitation may not apply to you.
